PERSPEX® CORAL

The unique Coral effect

Perspex® Coral is the latest exciting evolution from the dynamic Perspex® portfolio.

Inspired by nature, Perspex® Coral echoes the dramatic textures and effects growing in tropical coral reefs. Created by Perspex®, Coral is a deep, rich, textural 3D effect with a subtle, intriguing appearance.

When illuminated, the unique effect displays a shimmering iridescence. Change your perspective and it appears to dance and ripple across the surface.

Put all this together and you have Perspex® Coral – an innovative, dramatic and unique product – a true evolution in the world of acrylic.

Extraordinary style

- ▣ Distinctive 3 dimensional metallic effect
- ▣ Bespoke customer solution
- ▣ Effect appears to move subtly with changing lighting and perspective
- ▣ Each sheet has its own unique “fingerprint”
- ▣ Infinite colour possibilities

Perspex® Coral is perfect for: giving style and substance to architectural installations; adding an exclusive look to retail interiors; bringing colour and creativity to statement furniture pieces...

Tailored solution

Perspex® Coral is made to customer colour specifications in 10 x 3050 X 2030 mm sheets with a specially adapted minimum order quantity.

PERSPEX®
FROM LUCITE®

LUCITE®
The source of inspiration

The 3D nature of Perspex® Coral is due to the structure of the effect. This will reflect light in a number of directions and give the appearance of some variation in natural or perceived colour. This natural variation will also provide a directional effect. Samples are a photographic representation and may not accurately show reflected colours.

Perspex® and Lucite® are registered Trade Marks of the Lucite International Group of Companies.
