

# lucitelux™ frost

## GET INTO SHAPE!

Part of the innovative range of LuciteLux™ solutions, LuciteLux™ Frost has been a real crowd pleaser since it was originally launched in a range of subtle Pastel colors. A couple of years later the heat was turned up with the addition of Hot Frosts – a range of warm and exciting colors to give designers of internal and external POP and signs even more colors to choose from.

Now we have added even more choice to the LuciteLux™ Frost range with the development of two new color collections – Urban and Vivid.

LuciteLux™ Frost - the winning line-up:

- Vivid – Cutting edge modern colors – creative and cosmopolitan
- Urban – Cool, contemporary urban chic, a collection for a sophisticated loft lifestyle
- Hot – Make a strong and confident statement with these dramatic tones
- Pastel – Timeless and elegant, the classic Frost colors retain their allure

## FEATURES & BENEFITS

Whichever color you choose, you can be confident in the exceptional LuciteLux™ Frost product performance

- Cool frosted surface
- Modern contemporary appeal
- Resists surface marks and scratching
- Easy to cut, join and fabricate
- Retains frosted texture after thermoforming

Whether you choose one of the zingy new Vivid or Hot Frosts; a Pastel classic or the latest Urban shade – with LuciteLux™ Frost you not only get an unrivalled choice of color, but also the superlative service, guaranteed product performance and exciting innovation that you know you can rely on.

## APPLICATIONS

- POP
- Display units
- Interior signs and signage
- Interior fittings and furnishings
- And so much more.
