

LUCITELUX™ CORAL

The unique Coral effect

LuciteLux™ Coral is the latest exciting evolution from the dynamic LuciteLux™ Coral portfolio.

Inspired by nature, LuciteLux™ Coral echoes the dramatic textures and effects growing in tropical coral reefs. Created by LuciteLux™ Coral is a deep, rich, textural 3D effect with a subtle, intriguing appearance.

When illuminated, the unique effect displays a shimmering iridescence. Change your perspective and it appears to dance and ripple across the surface.

Put all this together and you have LuciteLux™ Coral – an innovative, dramatic and unique product – a true evolution in the world of acrylic.

Features & Benefits

- Distinctive 3 dimensional metallic effect
- Effect appears to move subtly with changing lighting and perspective
- Each sheet has its own unique “fingerprint”
- Infinite color possibilities

Applications

LuciteLux™ Coral is perfect for: giving style and substance to architectural installations; adding an exclusive look to retail interiors; bringing color and creativity to statement furniture pieces...

LuciteLux™ with Perspex® Coral is made to customer color specifications in .394 x 80 x 120 sheets with a specially adapted minimum order quantity.

The 3D nature of LuciteLux™ Coral is due to the structure of the effect. This will reflect light in a number of directions and give the appearance of some variation in natural or perceived color. This natural variation will also provide a directional effect. Samples are a photographic representation and may not accurately show reflected colors.

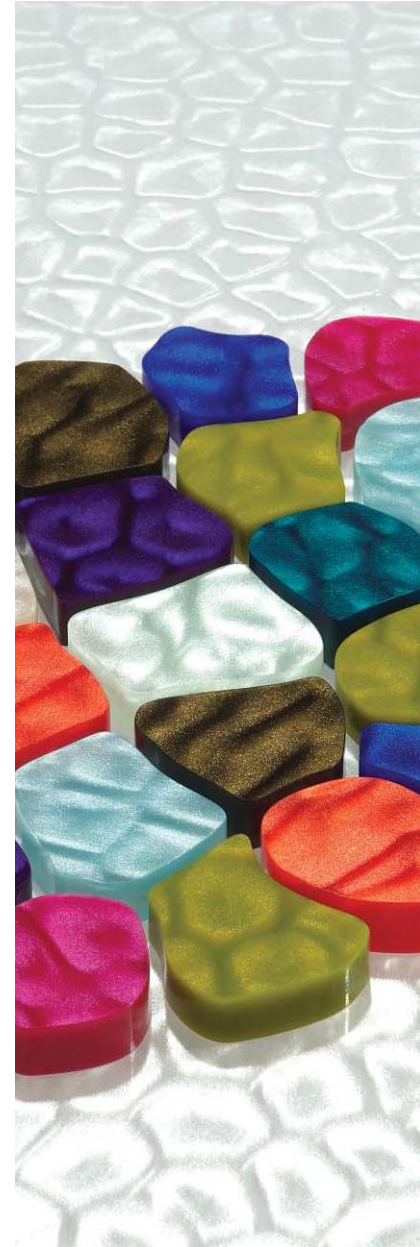

LuciteLux™ and Lucite® are registered Trade Marks of the Lucite International Group of Companies.

Lucite International, Inc. 7275 Goodlett Farms Parkway, Cordova, TN 38016-4909
Tel: 800-4-LUCITE | Tel: 901-381-2000 | Fax: 901-381-2447 | www.lucitelux.com

Lucite International is a global leader in the design, development and manufacture of acrylic based products including two of the world's best-known material brands, Lucite® and Perspex® from Lucite.

LuciteLux™ Coral material is cell cast from the UK and is sold as Perspex® exclusively in EAME.
