Lucite[®] Clear Sheet Now Offered in Museum Grade UV Protection

Memphis, Tenn., Friday, July 31, 2009 – Lucite International announces today that its clear cast acrylic sheet is now available with museum grade ultraviolet (UV) protection filtering out 98 percent of harmful ultraviolet lighting.

“Distributors and fabricators will now be able to provide their customers with acrylic offering the optimum in ultraviolet filtering protection,” Chris Robinson, sheet business manager for Lucite International says. “Museum grade crystal clear Lucite acrylic enhances art and artifacts by showcasing objects with true clarity letting detail and beauty shine through.”

“Whether used for enhancing and protecting the beauty of fine objects or people from harmful UV lighting, our museum grade Lucite sheet offers consumers added benefit and value backed with the durability and high standard of quality that is the Lucite brand,” Robinson adds.

On the opposite end of the UV spectrum, Lucite also offers its customers Lucite[®] UTRAN, a cast acrylic sheet which allows for UV light transparency that can be used in products ranging from tanning beds to greenhouses.

Lucite clear cast acrylic sheet is used in a myriad of applications for exhibit and retail displays, skylights, and much more.

For sales information regarding museum grade Lucite or Lucite UTRAN products, please contact Jane Nash at Lucite International at 1-800-4-LUCITE ext. 2426.
